

CAPABILITY STATEMENT

ABOUT US

Founded in 2014, 1 Accord Consulting, LLC is a minority-owned small business with an ISO 9001:2015-certified Quality Management System and an active facility security clearance. We specialize in delivering innovative IT, cybersecurity, and engineering solutions that support the missions of Federal agencies and the Department of Defense. With expertise spanning Systems Engineering, DevSecOps, Software Engineering, and Security Engineering, 1 Accord provides comprehensive support for mission-critical environments. Our team's commitment to innovation ensures the development of secure, automated infrastructures and custom software solutions that meet the stringent requirements of clients such as the NSA and other U.S. defense and intelligence agencies. Driven by excellence, we tailor our solutions to enhance operational resilience, security, and efficiency across every project.

CORE COMPETENCIES

- **Cybersecurity & Security Engineering:** Comprehensive security solutions, including security engineering, certification testing, vulnerability assessments, and compliance with DoD, NSA, and IC standards (e.g., NIST 800-53, DCID 6-3, FISMA). Ensuring system integrity through robust security protocols and proactive threat mitigation.
- **Systems Engineering & DevSecOps:** Expertise in designing, deploying, and managing high-availability production systems using AWS, VMware, Red Hat, Microsoft Windows, and SUN Solaris. Incorporates DevSecOps practices to ensure security is integrated into every stage of the development lifecycle.
- **Software Engineering & Automation:** Specializes in the automation of system builds, from bare-metal to fully virtualized infrastructures, leveraging VMware, OpenStack, and CI/CD pipelines for seamless integration. Proficient in developing custom software solutions and optimizing software development processes for speed and security.
- **Cloud & Virtualization Solutions:** Advanced capabilities in migrating organizations to cloud environments and implementing virtualized infrastructures. Tailored to enhance operational efficiency, scalability, and security across cloud and on-premises systems.
- **Integrated Testing & Compliance:** Comprehensive software and security testing, including development of test procedures, software code reviews, and execution of security test scenarios. Ensures systems are robust, compliant, and optimized to meet evolving operational demands.

CAGE CODE: 71VF1

SAM UEI: LSJPY53SEH46

NAICS: 541330, 541511, 541512, 541513, 541519, 541611, 541618, 541690, 541990, 561320, 611420, 611430, 541611

Provided cybersecurity solutions protecting over 500,000 users across Federal and defense networks.

Delivered 99.9% uptime for systems architecture and cloud environments.

Successfully secured over \$50 million in government contracts by delivering innovative solutions and exceptional service.

Supported over 100+ mission-critical systems for DoD and intelligence agencies.
